G1-M3-Lesson 1

1. Follow the directions. Complete the sentence.

Circle the longer dog.

I can see that Spot is longer because Spot and Abby are lined up perfectly, and Spot is sticking out further than Abby.

____Spot____ is longer than ____Abby____.

2. Write the words longer than or shorter than to make the sentence true.

The endpoints of the bottles are lined up. It's like they are standing on a table, which makes it easy to see. The glue is shorter!

The glue is ____shorter than____ the ketchup.
3. Pencil B is _______ longer than _______ Pencil A.
The dark bone is _______ shorter than _______ the light bone.

Circle true or false.
The light bone is shorter than Pencil A.  True or False

The end points are not lined up, but I can tell that Pencil B is longer because it crosses more than 3 stripes. Pencil A only crosses 2 stripes.

4. Find 3 school supplies. Draw them here in order from shortest to longest. Label each school supply.

eraser  crayon  scissors
G1-M3-Lesson 2

1. Use the paper strip provided by your teacher to measure each picture. Circle the words you need to make the sentence true. Then, fill in the blank.

I can see if the paper strip is longer or shorter than the baseball bat by lining up the endpoint of the paper strip with the endpoint of the bat. Then I can compare them!

The baseball bat is **longer than** the paper strip.

The book is **shorter than** the paper strip.

I know the baseball bat is longer than the paper strip, and the book is shorter than the paper strip, so the baseball bat must be longer than the book!

The baseball bat is **longer than** the book.

Lesson 2: Compare length using indirect comparison by finding objects longer than, shorter than, and equal in length to that of a string.

©2015 Great Minds, eureka-math.org
G1-M3-M001v1-3.0.07.2015
2. Complete the sentences with longer than, shorter than, or the same length as to make the sentences true.

The tube is **longer than** the bucket.

I used my paper strip to measure. The tube is longer than the paper. The bucket is shorter than the paper strip, so I know that the tube must be longer than the bucket.

Use the measurements from Problems 1 and 2. Circle the word that makes the sentences true.

3. The baseball bat is **longer** (shorter) than the bucket.

If the baseball bat is longer than the paper strip, and the bucket is shorter than the paper strip, then the bat is longer than the bucket!

4. Order these objects from shortest to longest: bucket, tube, and paper strip

   bucket          paper strip          tube

   The bucket is shorter than the paper strip, and the paper strip is shorter than the tube, so the bucket is the shortest, and the tube is the longest.
5. Draw a picture to help you complete the measurement statements. Circle the words that make each statement true.

Susie is taller than Donnie.
Jason is taller than Susie.
Donnie is (taller than/shorter than) Jason.

First I draw Susie and Donnie. Then I draw Jason. Since Donnie is shorter than Susie, and Susie is shorter than Jason, Donnie is also shorter than Jason!
G1-M3-Lesson 3

1. The string that measures the path from the doll house to the park is longer than the path between the park and the store. Circle the shorter path.

   the doll house to the park
   \[\underline{\text{the park to the store}}\]

   The Doll House
   The Park
   The Store

   If the string is longer, then the path is also longer!
Use the picture to answer the questions about the rectangles.

2. Which is the shortest rectangle?  _Rectangle B_

3. If Rectangle A is longer than Rectangle C, the longest rectangle is _Rectangle A_

4. Order the rectangles from shortest to longest:
   
   _B_  _C_  _A_

I can see that Rectangle B is the shortest, and it says that Rectangle A is longer than Rectangle C, so the order must be B, C, A!
Use the picture to answer the questions about the students’ paths to school.

5. How long is Caitlyn’s path to school? __10__ blocks
6. How long is Toby’s path to school? __12__ blocks
7. Joe’s path is shorter than Caitlyn’s. Draw Joe’s path.

Circle the correct word to make the statement true.

8. Toby’s path is __longer__/shorter than Joe’s path.
9. Who took the shortest path to school? __Joe__

10. Order the paths from shortest to longest.

___ Joe ___ Caitlyn ___ Toby ___
G1-M3-Lesson 4

Measure the length of the picture with your cubes. Complete the statement below.

1. The pencil is ____ centimeter cubes long.

   I can measure the pencil with my centimeter cubes. I have to line up the end points and make sure there is no space between each cube.

   I start at the tip of the pencil and use enough cubes to go all the way to the eraser.

2. Circle the picture that shows the correct way to measure.

   A
   
   3 centimeter cubes

   This isn't right! There are no cubes near the handle of the bat!

   B
   
   5 centimeter cubes

   This looks much better. The cubes start at the endpoint and go all the way across with no spaces in between.

3. Explain what is wrong with the measurements for the picture you did NOT circle.

   The picture that shows a measurement of 3 cubes is wrong because the cubes don't go all the way across the bat. The cubes don't start at the endpoint or end at the endpoint. There are not enough cubes!
G1-M3-Lesson 5

1. Use centimeter cubes to measure the pictures below. Complete the sentences.

   I can measure these pictures accurately as long as I line up the endpoints and don’t leave any gaps or overlaps with my centimeter cubes.

   Each of my cubes is one centimeter long.

   a. The hamburger picture is _4_ centimeters long.

   b. The hot dog picture is _6_ centimeters long.

   c. The bread picture is _5_ centimeters long.

   The bread picture measured 5 centimeter cubes long. That makes it 5 centimeters long.
2. Use the picture measurements to order the hamburger picture, hot dog picture, and bread picture from longest to shortest. You can use drawings or names to order the pictures.

Longest

hot dog picture

bread picture

hamburger picture

Shortest

The hot dog picture is the longest; it's 6 centimeters long. The hamburger picture is the shortest since it's only 4 centimeters long. That means the bread picture goes in the middle.

3. Fill in the blanks to make the statements true. (There may be more than one correct answer.)

a. The hot dog picture is longer than the ___bread___ picture.

b. The bread picture is longer than the ___hamburger___ picture and shorter than the ___hot dog___ picture.

c. If a banana picture is added that is longer than the bread picture, it will also be longer than which of the other pictures? ___hamburger___
G1-M3-Lesson 6

1. Order the bugs from longest to shortest by writing the bug names on the lines. Use centimeter cubes to check your answer. Write the length of each bug in the space to the right of the pictures.

The bugs from longest to shortest are

Caterpillar  Dragonfly  Bee

Dragonfly

5 centimeters

Caterpillar

7 centimeters

The caterpillar is the longest bug. The caterpillar is 7 centimeters long!

Bee

4 centimeters

The bee is the shortest bug. The bee is only 4 centimeters long!
2. Use all of the bug measurements to complete the sentences.
   a. The fly is longer than the ____ bee ____ and shorter than the ____ caterpillar ____.
   b. The ____ bee ____ is the shortest bug.
   c. If another bug is added that is shorter than the bee, list the bugs that the new bug is also shorter than.

   The new bug will be shorter than the fly and the caterpillar.

3. Tania makes a cube tower that is 3 centimeters taller than Vince's tower. If Vince's tower is 9 centimeters tall, how tall is Tania's tower?

   To solve, I can use Read, Draw, Write! Now that I have read the problem, what can I draw? I think I can draw the towers! I can start with Vince's tower since I know his is 9 cubes tall.

   I can write a number sentence to solve. 9 cubes + 3 cubes equals 12 cubes.

   \[9 + 3 = 12\]

   Tania's tower is 12 cubes tall.
G1-M3-Lesson 7

Measure the objects with the large paper clip strip (included with homework paper) and then again with the small paper clip strip (included with homework).

Fill in the chart on the back of the page with your measurements.

The caterpillar is about 5 small paper clips long. It’s longer than 4 small paper clips but not exactly as long as 5 small paper clips.

I need to use the same length unit. I can use all large paper clips or all small paper clips, but I can’t mix large paper clips and small paper clips.

I lay the paper clips end to end with no gaps and no overlaps.
<table>
<thead>
<tr>
<th>Name of Object</th>
<th>Length in Large Paper Clips</th>
<th>Length in Small Paper Clips</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. key</td>
<td>2</td>
<td>3</td>
</tr>
<tr>
<td>b. caterpillar</td>
<td>3</td>
<td>5</td>
</tr>
</tbody>
</table>

I knew that the length in small paper clips would be a bigger number. The smaller the length unit, the larger the measurement!

Large paper clip strip

Small paper clip strip

Lesson 7: Measure the same objects from Topic B with different non-standard units simultaneously to see the need to measure with a consistent unit.
G1-M3-Lesson 8

1. Circle the length unit you will use to measure. Use the same length unit for all objects.
   Small Paper Clips
   Large Paper Clips
   Toothpicks
   Centimeter Cubes

Measure each object listed on the chart, and record the measurement. Add the names of other objects in the classroom, and record their measurements.

<table>
<thead>
<tr>
<th>Classroom Object</th>
<th>Measurement</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. glue stick</td>
<td>8 centimeter cubes</td>
</tr>
<tr>
<td>b. dry erase marker</td>
<td>12 centimeter cubes</td>
</tr>
<tr>
<td>c. unsharpened pencil</td>
<td>19 centimeter cubes</td>
</tr>
<tr>
<td>d. new crayon</td>
<td>9 centimeter cubes</td>
</tr>
</tbody>
</table>

2. Did you remember to add the name of the length unit after the number? Yes No

I have to say centimeter cubes. If not, someone might think I am measuring with some other kind of cube!
3. Pick 3 items from the chart. List your items from longest to shortest:

a. ______ unsharpened pencil

b. ______ dry erase marker

c. ______ glue stick

I started with the longest thing I measured, the unsharpened pencil. Then I wrote the shortest one, the glue stick. Then I put the dry erase marker in the middle because it is shorter than the unsharpened pencil but longer than the glue stick.
G1-M3-Lesson 9

1. Look at the picture below. How much longer is Guitar A than Guitar B?

Guitar A is \(1\) unit(s) longer than Guitar B.

Guitar A is 4 units long. Guitar B is 3 units long. \(4 - 3 = 1\), so Guitar A is 1 unit longer.

2. Measure each object with centimeter cubes.

The blue pen is \(8\) centimeter cubes.

The yellow pen is \(10\) centimeter cubes.
3. How much **longer** is the yellow pen than the blue pen?
   The yellow pen is _2_ centimeters longer than the blue pen.

Use your centimeter cubes to model the problem. Then, solve by drawing a picture of your model and writing a number sentence and a statement.

4. Austin wants to make a train that is 13 centimeter cubes long. If his train is already 9 centimeter cubes long, how many more cubes does he need?

   ![Diagram of Austin's Train](image)

   __9 + 4 = 13__

   **Austin needs 4 more cubes.**

   ![Diagram of the Train Austin Wants](image)

   I can use an addition sentence or a subtraction sentence to solve. I can say 13 − 9 = 4, or I can say 9 + 4 = 13.
G1-M3-Lesson 10

Students were asked about their favorite kind of fruit. Use the data below to answer the questions.

<table>
<thead>
<tr>
<th>Ice Cream Flavor</th>
<th>Tally Marks</th>
<th>Votes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Apple</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Strawberry</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Banana</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1. Fill in the blanks in the table by writing the number of students who voted for fruit.

2. How many students chose apple as the fruit they like best?
   \[ 2 \] students

3. What is the total number of students who like apple or strawberry the best?
   \[ 6 \] students

4. Which fruit received the least amount of votes?
   \[ apple \]

5. What is the total number of students who like banana or apple the best?
   \[ 10 \] students

6. Which two flavors are liked by a total of 12 students?
   \[ strawberry \] and \[ banana \]

7. Write an addition sentence that shows how many students voted for their favorite fruit.
   \[ 2 + 4 + 8 = 14 \]
8. A group of people were asked to say their favorite color. Organize the data using tally marks, and answer the questions.

<table>
<thead>
<tr>
<th>Orange</th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Yellow</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Purple</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

I can count each vote and make a tally. It's a little harder than it was in class because I can't see which ones I have counted, so I just cross them off as I count.

9. Which color received the least amount of votes? purple

10. How many more people like yellow than purple? 2 students

11. What is the total number of people who like orange and purple the most? 9 students

12. Which two colors did a total of 11 people vote for? orange and yellow

7 students like orange, and 4 students like yellow. 7 + 4 = 11.

13. Write an addition sentence that shows how many people voted for their favorite color.

7 + 4 + 2 = 13
G1-M3-Lesson 11

Collect information about the block you live on. Use tally marks or numbers to organize the data in the chart below.

<table>
<thead>
<tr>
<th>How many brick buildings/houses are on your street?</th>
<th>How many two story buildings/houses are on your street?</th>
<th>How many one story buildings/houses are on your street?</th>
<th>How many grassy lawns are on your street?</th>
<th>How many buildings/houses with a garage are on your street?</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>11</td>
<td>9</td>
<td>15</td>
<td>4</td>
</tr>
</tbody>
</table>

- Complete the question sentence frames to ask questions about your data.
- Answer your own questions.

It's easy to see that the most houses have grassy lawns because there are so many tallies!

1. How many __grassy lawns__ are there? (Pick the category that has the most.) __9__

2. How many __brick buildings__ are there? (Pick the item you have the least of.) __2__

3. __Together__, how many brick houses and houses with garages are there? __8__

4. Write and answer two more questions using the data you collected.
   a. __Are there more one story or two story houses?__  __There are more one story houses__.
   b. __Together, how many one story and two story houses are there?__ __9__
Workers voted on their favorite snack food for the office kitchen. Each worker could only vote once. Answer the questions based on the data in the table.

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Crackers</td>
<td><img src="image1" alt="Image" /></td>
<td><img src="image2" alt="Image" /></td>
</tr>
<tr>
<td>Popcorn</td>
<td><img src="image3" alt="Image" /></td>
<td><img src="image4" alt="Image" /></td>
</tr>
<tr>
<td>Fruit</td>
<td><img src="image5" alt="Image" /></td>
<td><img src="image6" alt="Image" /></td>
</tr>
</tbody>
</table>

5. How many workers chose popcorn? **6** workers

6. How many workers chose fruit or crackers? **8** workers

7. From this data, can you tell how many workers are in this office? Explain your thinking.

   *I think there must be 14 workers in the office because I counted each person who voted. There could be more though because what if someone was absent that day or just did not vote?*

   I know that \(3 + 6 = 9\), and then there are 5 more. \(9 + 1 = 10\), and then I add on 4 more, and I get 14.
G1-M3-Lesson 12

The class has 20 students. 10 students ride their bikes to school, 7 ride the bus, and 3 come in a car. Use squares with no gaps or overlaps to organize the data. Line up your squares carefully.

<table>
<thead>
<tr>
<th>How Students Came to School</th>
<th>Number of Students</th>
<th>☐ represents 1 student</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bike</td>
<td>![Bike Image]</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Bus</td>
<td>![Bus Image]</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Car</td>
<td>![Car Image]</td>
<td></td>
</tr>
</tbody>
</table>

I line my squares up carefully with no gaps in between and no overlaps. I started from the same endpoint.

1. How many more students rode a bike than rode the bus? __3__ students

2. Write a number sentence to tell how many students were asked about how they come to school.
   
   \[ 10 + 7 + 3 = 20 \]

   I add the number of bike riders, bus riders, and car riders!

3. Write a number sentence to show how many fewer students rode in a car than the bus.
   
   \[ 7 - 3 = 4 \]
G1-M3-Lesson 13

Use the graph to answer the questions. Fill in the blank, and write a number sentence.

Class Play Audience

<table>
<thead>
<tr>
<th>Students</th>
<th>Teachers</th>
<th>Parents</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Students" /></td>
<td><img src="image2" alt="Teachers" /></td>
<td><img src="image3" alt="Parents" /></td>
</tr>
</tbody>
</table>

1. How many more students are at the play than teachers? $7 - 3 = 4$
   There are \(4\) more students than teachers.

2. How many fewer parents are at the play than students? $7 - 5 = 2$
   There are \(2\) fewer parents.

3. If 2 more teachers attend the play, how many people will be there? $5 + 5 + 7 = 17$
   There will be \(17\) people.

---

**EUREKA MATH**

Lesson 13: Ask and answer varied word problem types about a data set with three categories.
